SOME NEW VARIETIES OF SPECIAL MERIT

Cucumber— Early Fortune

The finest type of White Spine yet introduced. Early, very productive and disease-resistant. Color, rich dark green; flesh white, very firm and crisp with few seeds. It keeps its color a long time. A fine shipping sort, also fine for pickles.

Pkt. 10c; oz. 25c; $\frac{1}{4}$ lb. 75c.

Golden Sunshine Corn

A Yellow Corn of the Golden Bantam type that will compete with the first early white sweet corns. An extra early yellow variety of high quality. Stalks growing $4\frac{1}{2}$ to 5 feet high often producing 2 or more fine ears, closely set with attractive yellow kernels of superb quality.

See page 5 for further description and price of this fine sweet corn.

Beet—Early Wonder

One of the earliest and most perfect shaped Beets. Its beautiful, deep blood-red, nearly globular-shaped root, small-sized top, and small clean tap root, make it desirable. Its attractive appearance, uniformity of size, shape and color, and excellent keeping qualities have created a splendid demand for this sort.

Pkt. 10c; oz. 20c; $\frac{1}{4}$ lb. 50c; lb. \$1.50

Marglobe Tomato

Dr. Twitchell writes us as follows regarding the New Marglobe Tomato:

"In long experiments with tomatoes I have been forced to discard many popular varieties for the reason I found something better.

"Thus the Red Head took the place of the Earliana and John Baer and now Marglobe has come in to take the place of all save Red Head, grown solely because earlier. It is of smooth shape, not overgrown, but comes in large clusters of medium size."

A GRAND MELON FOR NEW ENGLAND

Metcalf's "Thousand Dollar" Musk Melon

This melon has been grown by Mr. Metcalf of Cumberland County for over twenty years, of whom we secured a small supply of seed.

The following is his description:

"More than 20 years ago, a horticultural friend told me he had been talking with a man interested in gardening who told him of a superior variety of Musk Melon he was growing. Soon after he gave him a few of the seeds; these he divided with me. We both planted them the next season with good success. After they had ripened I called at the home of my friend one evening. When he brought in a nice looking melon and opened it, as he did so, its fine appearance and de-

lightful odor caused him to exclaim: 'Ah! That's worth a thousand dollars.' Since then it has been known as the Thousand Dollar Melon. I have continued to plant this variety every year since, saving seeds from the best and first to ripen each year and know of no other variety any better or will ripen as early."

The Melons averaged two to six pounds.

Price per packet, 15c. Maine Grown Seed.

Per ½ oz. 25c; oz. 45c. Short Crop.

Your Thousand Dollar Musk Melon is the best melon I ever saw, very meaty and the finest flavor. Grew some that weighed 14 lbs. and they were just as good as those that weighed 5 to 8 pounds.

If You Want the Best All-around Musk Melon, Plant Our Thousand Dollar

Gathering Bobolink Beans for Home Canning

BOBOLINK POLE BEANS BEST ON EARTH

If you want the very best, most tender and delicious "String Beans," raise the Bobolink. The best pole bean for northern planting, extremely early and very prolific, the vines bearing long, flat, meaty pods, entirely free from strings or fiber, a rich, light green color, very attractive, most excellent quality, the very best of all the pole beans. Plant enough to can—they are delicious. This splendid variety is soon bound to be the most popular Pole Bean grown. In many respects they surpass anything we know of. The pods retain their stringless and tender qualities until they are almost ripe. They are hardy, easily grown and enormously productive.

Large packet, postpaid, 15c; ½ pt. 20c; pt. 40c; qt. 75c.

Monmouth, Me., Feb. 1st, 1921.

Pine Tree State Seed Co.,

W. R. Kimball, Mgr.

My dear Mr. Kimball:—The years but confirm my judgment regarding the superiority of your Bobolink Pole Beans. Selecting my seed from the pods at the top of the pole, I find that the season for maturity has been shortened so that the past year they were ready for the table three days after the first picking of my earliest bush Wax. Growth is rapid and abundant, yield heavy and quality beyond anything I ever raised.

Twenty years reliance on your goods justifies a strong word of commendation—my best wishes are with you.

Sincerely,

G. M. TWITCHELL.

The above cut was made from a photo taken at Dr. Twitchell's farm early in September. From a patch fifteen feet square he gathered 235 fine melons.

Golden Champion Musk Melon

The seed of this fine melon was grown for us by Dr. G. M. Twitchell at his Experimental Farm at Monmouth, Maine. The following is his description: The fruits are nearly round in shape, slightly ribbed, well netted, weighing from three to eight pounds each. The yield is heavy, meat very thick, shell exceedingly thin, very juicy and of a delicious and pronounced flavor, heavy cropper, short crop. Price per packet, 15c; $\frac{1}{2}$ oz. 35c.

LETTUCE—NEW YORK OR WONDERFUL

Recommended for Summer heading. Produces immense heads, 15 to 18 inches across and as solid as a cabbage. The outer leaves are rich dark green, white, the heart blanches up beautifully and the quality is superb. Crisp, tender and delicious. Absolutely free from bitterness. This is the lettuce grown so largely in California and shipped East. Pkt. 10c; oz. 40c; $\frac{1}{4}$ lb. \$1.25.

King of Denmark Spinach

A remarkable new spinach that is far superior to all of the older kinds. Its principal advantage is that it stands two weeks longer before running to seed than any other variety. It also grows larger and yields more and is of superior quality.

The leaves are large, rounded, somewhat blistered and deep green. The plants grow vigorously and are ready to use as soon as any kind; while at the same time they remain a long time in good condition after other kinds have run to seed. Pkt. 10c; oz. 15c; $\frac{1}{4}$ lb. 30c; lb. 85c.

GOLDEN ACRE CABBAGE—A valuable new variety from Denmark considered the most important recent Cabbage introduction. Eighty days from date of sowing. Heads measure 9 in. in diameter, entire plant occupies a space of 20 in. Ten days earlier than Copenhagen Market Cabbage. If you cater to the early market by all means try the Golden Acre. Pkt. 15c; $\frac{1}{2}$ oz. 50c; oz. \$1.00.

OUR 10c PACKETS OF VEGETABLE SEEDS ARE EXTRA LARGE AND WELL FILLED

New Pole Bean—Sunset or Golden Podded Bobolink

New Pole Bean—Sunset

Or Golden Podded Bobolink

This fine new golden podded butter pole bean originated here in Maine. We have named it the Sunset. The seed was grown for us by Mr. Donald W. Ellis at Sunset Ridge Farm in Kennebec Co. The pods are of a bright golden yellow sunset color, very early, a few days earlier than our celebrated Bobolink Bean which it resembles in many ways except for the color of the pod.

Extremely tender and entirely stringless, of a rich melting buttery flavor possessed by no other bean, very productive and bears a large quantity of rich golden yellow pods until the vines are killed by frost, very meaty and growing in clusters and entirely stringless at all stages of growth. The dry beans are of very superior quality for baking.

We are the first to introduce this fine bean and after giving it a thorough trial last season we offer it with confidence to the public. If you want the very best, most tender and delicious "String Beans," raise the Sunset. Packet 15c. $\frac{1}{2}$ pt. 30c; pt. 60c. Short crop, only one pint to a customer.

New Extra Early Pea

Carter's Early Eight Weeks

By far the earliest grown coming into picking condition before any of the other extra earlys. It bears large, well filled pods on dwarf, but vigorous vines, 15 to 18 inches high. Especially desirable for the home gardener who wants peas earlier than his neighbor.

Large Pkt. 10c; $\frac{1}{2}$ pt. 20c; pt. 35c; qt. 65c; pk. \$3.50.

State of Maine Yellow Eye Bean

One of the most profitable beans to raise for the market. Produces large crops and matures early. The best bean for baking. Less subject to disease than any other variety of field beans. A rust-resistant strain. Pkt. 10c; pt. 25c; qt. 40c; peck \$3.00.

Bush Beans—Brittle Wax

One of the best early varieties. The pods are round and long, often six to seven inches in length, a rich, golden yellow; stringless and brittle.

When ripe makes a good shell bean. Large packet 10c; $\frac{1}{2}$ pt. 20c; pt. 35c; qt. 65c. (Short Crop).

WATER MELON YANKEE.—Best for New England. This new melon is a fine variety for the family and market, very early and prolific. The bright red flesh is cool crisp and sweet. Will mature anywhere in Yankee land. Pkt. 10c; oz. 20c; $\frac{1}{4}$ lb. 45c; lb. \$1.50.

Wonder Golden Bantam

The Best of the Yellow Kinds of Sweet Corn

EXTRA EARLY GOLDEN SUNSHINE.—A new type of Golden Bantam, having, the same fine quality but maturing its good sized ears about 10 days earlier, many stalks carrying two ears. The stalks grow about 4½ feet high, ears 12 rows of golden yellow sweet kernels of superb quality. Pkt. 10c; ½ pt. 20c; pt. 35c; qt. 65c.

MAINE GROWN EXTRA EARLY GOLDEN BANTAM.—Our seed was grown for us by Dr. Twitchell at his farm at Monmouth and for the past ten years has been perfecting this fine strain, selecting each year with special reference to sweetness. Extra early and the sweetest of all the yellow types of Sweet Corn. Pkt. 15c; ½ pt. 25c; pt. 40c; qt. 75c. (Short Crop).

WONDER GOLDEN BANTAM.—It is the very cream of the Yellow Sweet Corns today on the market. It is Golden Bantam larger, stronger grower and a much better yielder. The stalks grow from five to six feet high and have ears from eight to ten inches in length, filled with eight rows of rich golden colored kernels and just as early as the old style Golden Bantam but more vigorous and productive. It is a variety that will appeal to the critical Market and Home Gardener. Packet 15c; ½ pt. 20c; pt. 35c; qt. 60c.

Dr. G. W. Twitchell tested this corn at his experimental farm at Monmouth, Me., the past season and writes as follows:

"Your Wonder Bantam Corn is about a week later than Burpee's Golden Bantam, has a much larger ear, holds a longer season without hardening, is fully sweeter and very delicious."

EXTRA EARLY GOLDEN BANTAM.—An extra early type grown especially for us. Very hardy and will stand planting earlier than most varieties. Because of its extremely early character is especially adapted to our New England soil and climate, of vigorous growth and surpassing delicious flavor, maturing a week earlier than other varieties of the golden type. BURPEE'S GOLDEN BANTAM.—One of the best extreme early varieties. Dwarf and sturdy in habit, growing about four feet high and bearing two or three good ears to each stalk. JAPANESE ONIONS GROWN FROM SETS

Japanese Onions Grown From Our Sets

We call your attention to the photograph above of **Japanese Onions** grown from sets. This onion was originally called **Ebenezer**, was grown and introduced by the Market Gardeners of Ebenezer, N. Y.

These sets were grown by Dr. G. M. Twitchell at his experimental farm at Monmouth, Maine and weigh three-quarters of a pound each.

This onion will actually double the yield of any other onion set on the market. It throws very few seed stalks; is the best keeper and best flavored onion we have ever seen. Similar in size and shape to the Old Fashioned Yellow Danvers. **One Thousand Bushels Per Acre** is common. One customer last year actually reported ninety bushels of onions from one bushel of sets. Price per $\frac{1}{2}$ pt. 15c; pt. 25c; qt. 40c.

JAPANESE OR EBENEZER ONION SEED.—See Page 17 for a description of this fine new onion.

Friend Kimball:

I want to thank you for sending me the Japanese Onion Sets. From two quarts I grew three bushels of very choice onions, many weighing three-quarters of a pound each and some fifteen ounces. The quality superior. The sets were planted April 26th and early in July I was selling bunches of four each, weighing one and one-half pounds. I want to thank you for introducing this very valuable variety of onion sets. Have just closed the twenty-seventh year with your seeds and have not met failure in any case yet.

Very truly,

G. M. TWITCHELL.
